

Elfun Science Program Visits Johnstown

Elfun Science Volunteers participated in the Warren Street Elementary School, Johnstown, Arts and Science Night on March 14th. Carl VanTine and the VandeGraff generator made hair (and a mop head) stand on end. Sparks were flying on John Viertel's Whimshurst machine. Kaushik Sampath, Caleb Brown and Phyllis Budka showed children and their parents how to turn muscle energy into electrical energy and how to wire a simple circuit.
