

## Elfun Science at Delaware Community School in Albany

Elfun Phyllis Budka, Tobias Juetting, John Marshall, Kaushik Sampath and John Viertl brought their electricity science “toys” to the Delaware Community School’s annual Science Night Friday, March 7th. Delaware Community School is the City School District of Albany's only school offering a bilingual education program, teaching students in both English and Spanish. This was the third time Elfun supported in this delightfully educational family event. More than 250 students, siblings and parents attended.
